	Examiner Toan C. To	Art Unit 3616	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 January 2006.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 24 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Recitation "each of said chambers fluidly communicating with at least one other chamber prior to activation of gas generator" in claim 24 renders the claim indefinite for being unclear because according to the specification, the gas generant charge 25 is preferably positioned in the chamber 25, and the gas generant charge 25 produces gas in response to activation of the gas generator, in other words, each of the chambers fluidly communicates to each other after activation of the gas generator but not prior to activation of the gas generator.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 24-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Takahashi et al (U.S. 6,328,336).

Art Unit: 3616

With respect to claims 24-26, Takahashi et al discloses a gas generator for a vehicle occupant protection system comprising: a housing (2); a plurality of chambers (chamber within the diffuser 15, chamber between the inflator housing 2 and container 5, chamber 9, chamber within container 5) formed within said housing, wherein each of said chambers fluidly communicates with at least one other chamber, whereby the chambers are formed to establish opposing fluid flow in each adjacent chamber (see attached figure 1 below) upon gas generator activation (fluid flow in the chamber of diffuser 15 is opposed to fluid flow in the chamber between the housing 2 and container 5); wherein, the gas generator comprising four substantially parallel chambers (chamber within the diffuser 15, chamber between the inflator housing 2 and container 5, chamber 9, chamber within container 5) extending in said housing.

Figure 1 of Takahashi et al is attached below for better illustration of the examiner's interpretation.

Response to Arguments

5. Applicant's arguments, see remark, filed January 3, 2006, with respect to claim 21-23 have been fully considered and are persuasive. The rejection of claims 21-23 in previous office action has been withdrawn.

Allowable Subject Matter

6. Claims 1-23 are allowed.

Arrows in the chambers indicated directions of fluid flow

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3616

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
